- Product
- Inspection
- Population

RECOMMENDATIONS

- System Review
- Date
- Gender
- Location
- Inspection
- Product

Objectives

- ❖ Assess the effect of the date on the conversion rate.
- ❖ Examine the impact of the location on the conversion rate.
- ❖ Investigate how product type influences the conversion rate.
- ❖ Analyze the correlation between the gender of the client and the conversion rate.
- ❖ Evaluate the influence of the inspection program on the conversion rate.

Conversion Rate

The conversion rate is **44.4%** (100 out of 225 leads), leaving 125 prospects, which account for the remaining **56%**

Facts

Executives

The sales conversion rate showed that only two executives, Funmi and Ngozi, achieved **57.1%** and **71.4%**, respectively, while the other four had negative rates ranging from **-22.7%** to **-41.9%**.

Facts

Weekly Performances

The conversion rate of customers was up in **1st**, **3rd** and **4th** week but went down in **2nd** and **5th**, whereas it will move up with prospects and the review of the systems

Facts

Gender

The product appeal more by male gender with higher conversion rate of **72.3%**

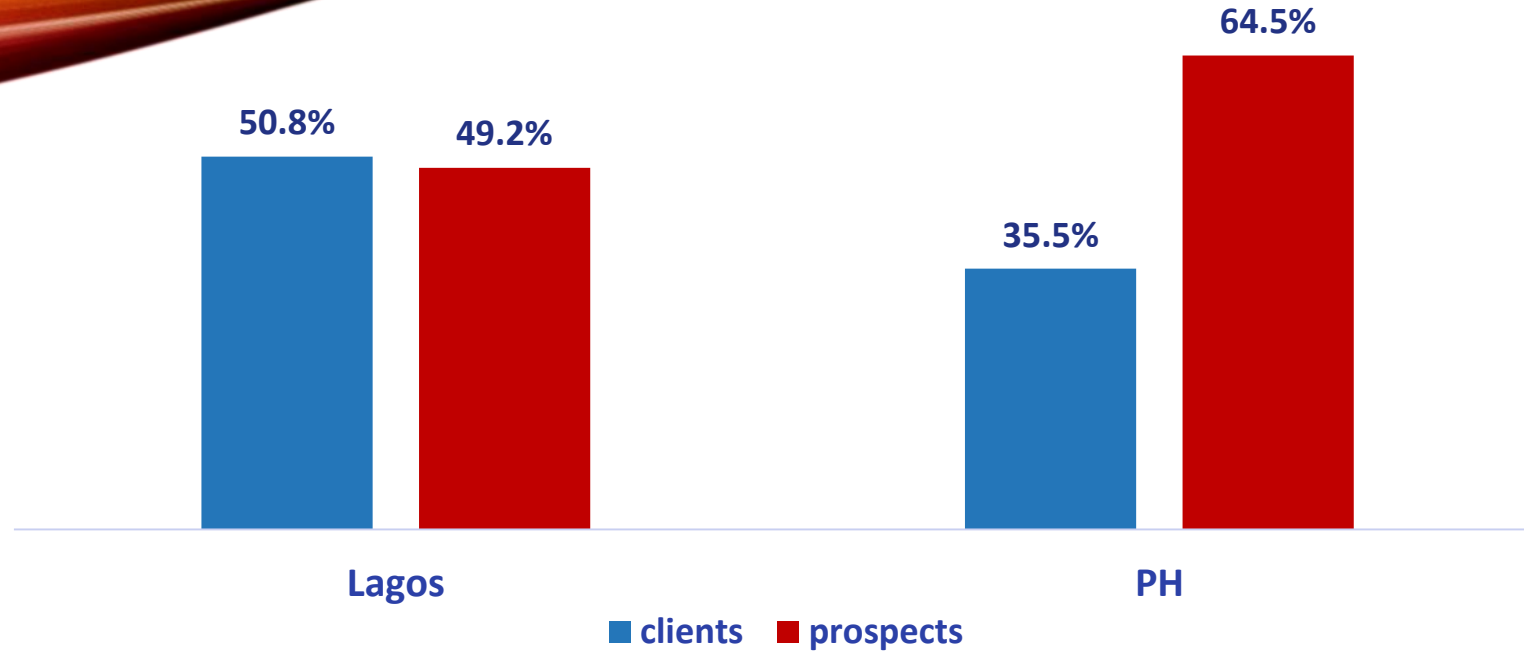

Gender

	<i>Female</i>	<i>Male</i>	<i>Paid</i>
Female	1		
Male	-1	1	
Paid	-0.88994	0.88994	1

- There is a strong positive correlation between male and conversion rate (0.889) which means as you increase the number of male leads, there will likely be an associate increase in the number of payment (conversion rate)
- There is a strong negative correlation between female and conversion rate (-0.889) which means as you increase the number of female leads, there will likely be an associate decrease in the number of payment (conversion rate)

Location

The location conversion rate distribution clearly indicate that Lagos is the best performing location with the highest conversion rate of **50.8%**, while Port Harcourt has **35.5%**.

There is no correlation between location and conversion rate.

Insights

Products

The product conversion rate distribution clearly indicates that customers preferred residential products, which had the highest conversion rate of **64.6%**, followed by commercial products (**34.6%**), while industrial products had **0.0%**

Products

	Commercial	Industrial	Residential	Paid
Commercial	1			
Industrial	0.373551097	1		
Residential	-0.734781943	-0.903679345	1	
Paid	-0.60121431	-0.669686681	0.767237221	1

- There is a strong positive correlation between Residential products and conversion rate **(0.767)** which means as you increase the number of residential product leads, there will likely be an associate increase in the number of payment (conversion rate)
- There is a moderate negative correlation between commercial products **(-0.60)**, industrial products **(-0.669)** and conversion rate which means as you increase the number of those products leads, there will likely be an associate decrease in the number of payment (conversion rate)

Insights

Inspection

Inspection - No

Inspection - Yes

The conversion rate of customers that went for the inspection was 55% while that of people that did not go for inspection was 11.1%

Inspection

	No	Yes	Paid
No			1
Yes	-1		1
Paid	-0.880586575	0.880586575	1

- There is a strong positive correlation between leads that went for inspection and conversion rate (0.88) which means as increase the number of leads that go for inspection there will likely be an associate increase in the number of payment (conversion rate)
- There is a strong negative correlation between leads that did not go for inspection and conversion rate (-0.88) which means as you increase the number of leads that did not go for inspection, there will likely be an associate decrease in the number of payment (conversion rate)

Population

According to external extraction from Google, the projected population of Lagos and Rivers in the year 2023 are **15,945,912** and **7,492,366** respectively

Population

- Lagos, as Nigeria's commercial and most industrialized city, has a higher concentration of workers with disposable income who can afford commercial properties.
- A large population likely contributes to residential products being a strong performer
- Population size might influence conversion rates, with Lagos being more populous than Port Harcourt
- Economic Disparities: Conversion rates can vary based on the economic status of different regions. Wealthier areas may see higher conversion rates, while economically challenged location like states may struggle.

System Review

- **Improve Sales Training:** Regularly train your sales team on new techniques, product knowledge, and customer engagement strategies.
- **Align Marketing and Sales:** Foster closer collaboration between marketing and sales teams through joint planning sessions, shared goals, and regular communication. This alignment ensures consistent messaging and better lead conversion.
- **Monitor Competitor Strategies:** Regularly analyze competitor marketing and sales strategies to stay competitive. Adjust your approach as needed to maintain a competitive edge.
- **Track KPIs and Evaluate:** Establish clear key performance indicators (KPIs) to measure the success of the marketing and sales efforts. Continuously monitor and refine strategies based on performance data

Recommendations

Date

- Revamp the marketing and sales campaign strategy by scheduling marketing campaigns during peak conversion periods identified in the weeks to maximize impact.
- Leverage Seasonal Opportunities by targeting promotions and offers to align with key dates, holidays, or seasons when conversion rates tend to rise.

Recommendations

Gender

- **Personalized communication and monitor to optimize:** Use personalized communication to engage male clients based on their gender-specific preferences and interests, which could lead to higher and conversion rates.
- **Gender-Inclusive Campaigns:** Ensure that marketing campaigns are inclusive and consider the preferences of both genders. This will also improve overall conversion rates.

Recommendations

Location

- **Advance Marketing Strategies in Lagos State:** Develop location-specific marketing campaigns that align with the preferences and economic conditions to boost conversion rates in Lagos
- **Address Market Saturation:** In saturated markets like Port Harcourt, consider strategies such as product differentiation, targeting underserved customer segments, or introducing new product offerings to stimulate demand

Recommendations

Inspection

- **Leverage customers testimonials** from customers in the conversion rate who benefited from the inspection program to demonstrate its effectiveness and influence on their purchasing decision
- **Emphasize Inspection Results in Marketing:** Highlight the benefits of your inspection program in marketing review by showcasing how it adds value and attract more customers

Questions & Answers
